SUMMARY

Frontend Engineer with 4+ years of professional experience building production-grade web applications — from enterprise warehouse systems and LMS platforms to restaurant ERP products. Delivered 5+ live products as sole or lead frontend developer, consistently owning full feature cycles from architecture to deployment. Strong in React, TypeScript, and Redux Toolkit; expanding into full-stack development with Node.js/Express. Available for remote opportunities.

SKILLS

Frontend	React.js, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, RTK Query, Zustand, React Hook Form, Zod, React Router DOM, React DnD, Framer Motion
UI & Styling	Tailwind CSS, Material UI, Radix UI, ShadCN UI, Bootstrap, ApexCharts, Recharts, Nivo Charts
Backend & APIs	Node.js, Express.js, RESTful APIs, Firebase (Auth, Realtime DB, FCM), Socket.io, JWT, Laravel (API integration)
Databases	MySQL, Sequelize ORM, Firebase Realtime Database
Tools	Git, GitHub, Vite, Postman, Figma, Trello, i18next (LTR/RTL), n8n (Workflow Automation)

EXPERIENCE

Frontend Developer Apr 2024 – Present | Remote, Full-time
Amyal Smart Company

- Built a Warehouse Management System (WMS) from scratch as the sole developer across 15 frontend screens covering dashboard analytics, order preparation, cycle count, returns center, driver management, and reporting.
- Engineered a blind count audit system with SKU-level locking to prevent race conditions when multiple floor workers count the same item simultaneously.
- Implemented a dynamic layout injection engine generating role-aware headers and sidebars from a single source of truth across 15 HTML pages, eliminating duplicate markup.
- Designed an interactive visual storage map grid with drag-and-drop bin assignment and real-time low-stock alerts via Socket.io.
- System supports 100K+ order records with sub-second query performance; serves 6 user roles (Admin, Driver, Auditor, Preparer, and more).

Stack: Node.js, Express.js, Socket.io, Sequelize, MySQL, Vanilla JS, Tailwind CSS, Chart.js, SheetJS, html2pdf.js, JWT

Freelance Frontend Developer Feb 2022 – Present | Remote
Independent Contracts — Ertiqaa Academy, HAYA Academy, Mrs. Ayat Asaad Platform

- Ertiqaa Academy: Sole frontend developer across 68 screens and 4 role-based dashboards; built a polymorphic assessment engine supporting 6 question formats under a unified Redux reducer with automatic progress saving.
- Solved a token refresh race condition in RTK Query middleware using async-mutex, eliminating redundant API calls on simultaneous expired-token requests.
- Built a dual-page PDF viewer with dynamic viewport scaling and a 20-second engagement tracker, optimizing performance to eliminate redundant re-render loops using useMemo.
- HAYA Academy: Implemented an anti-piracy video system combining CSS animated watermarks with FFmpeg range-based streaming (3MB chunks), blocking direct URL access and screen recording.
- Mrs. Ayat Asaad: Delivered 80%+ page load speed improvement; built a dual-layer anti-piracy system and a 3-type coupon payment engine with digital wallet integration.

Stack: React 18, TypeScript, Redux Toolkit, RTK Query, Framer Motion, React DnD, Firebase, i18next, Laravel, Alpine.js, FFmpeg, MediaRecorder API

Co-Founder & Lead Frontend Developer

Jan 2021 – Jan 2024 | Project-based

Web Point — Restaurant ERP

- Co-built and sold a complete Restaurant ERP system now deployed across 4+ active dining businesses.
- Built a drag-and-drop dining floor layout builder, reducing floor modification time from hours to minutes.
- Implemented a hand-built touch/mouse swipe framework for POS cart actions without a third-party gesture library.
- Designed 51 granular user permissions using Spatie Laravel Permission with full RBAC across Admin, Kitchen, Delivery, and Customer-facing roles.

Stack: Vue.js v2, Laravel v6, jQuery, Bootstrap v4, Spatie Permission, mPDF

Frontend Developer

Jul 2022 – Dec 2022 | Remote, Full-time

Alwasetah Company

- Refactored legacy UI components to modern CSS design tokens, improving maintainability and visual consistency.
- Rebuilt responsive layouts for landing pages and admin dashboards, achieving full cross-device compatibility.

PROJECTS

Warehouse Management System (WMS) | 2024 | Full Stack Solo Build | Live

Enterprise inventory platform — blind count audit, visual storage map, barcode/QR integration, Socket.io real-time sync, 100K+ records at sub-second speed. Stack: Node.js, Express, MySQL, Socket.io, Vanilla JS, Tailwind, Chart.js

Ertiqaa Academy LMS | 2023 | Sole Frontend Developer | ertiqaaedu.com

68-screen LMS with polymorphic quiz engine (6 formats), real-time leaderboard at 60fps, FCM push notifications, dual-page PDF viewer. Stack: React 18, TypeScript, Redux Toolkit, RTK Query, Firebase, Framer Motion

Web Point Restaurant ERP | 2021–2024 | Co-Founder | Deployed to 4+ businesses

Complete restaurant suite: drag-and-drop floor builder, POS swipe gestures, real-time checkout calculations, 51-rule RBAC. Stack: Vue.js v2, Laravel, jQuery, Bootstrap

EDUCATION

Bachelor of Science, Civil Engineering

Zagazig University, Egypt | 2017–2022

Information Technology School

Ismailia, Egypt | 2012–2017 — Built school website as graduation project

LANGUAGES

Arabic — Native | English — Professional Working Proficiency
